IndasForm® is a range of anatomically shaped pads designed to manage moderate/heavy urinary incontinence.

1. Textile feel back sheet for improved comfort and discretion.
2. Double absorbent core with acquisition layer for improved leakage protection, skin dryness and odour protection to reduce the risk of unpleasant smells.
3. White full barrier leg cuff reduces the risk of leakage.
4. Wetness and saturation level indicator: two yellow lines that gradually change to blue when the pad contains urine. This aids good nursing practice and acts as a guide to when the pad requires changing.
5. Diffusion channels distributes urine throughout the pad which helps to provide exceptional skin dryness.
6. Dermobands, the skin care solution: Blackcurrant to protect the skin, aloe vera to soothe irritation, and ambiyat extract to regenerate the skin. The outer layer that comes into contact with the skin is impregnated with an emulsion created from these natural ingredients, which provide protection and care to the skin.
7. Anatomically shaped core for a close comfortable fit on the body.
8. Absorption indicated on the back for easy product identification.
## IndasForm Fact Sheet - April 2018
